**Mineralite - Sandstone collection:** Used Outside and Inside

This collection is a flexible stone, with a surface that highly mimics the natural colours and texture of Australian Sandstone. It is much lighter, capable of bending for curved designs, with a weight only around 6% of real stone. Water resistant and fire-resistant, it is an ideal choice for modern architectural decoration.

Mineralite – Supports direct fix application onto wall surfaces, streamlining installation and significantly reducing construction timelines. It is bendable to wrap around columns and curved corners, suitable for both indoor and outdoor applications, be it residential or commercial walls and facades.

- Eco-Friendly:** Made using sustainable materials and processes.
- Fire Rating:** Group 1 (AS 5637.1 & AS 3837)
- Material:** Flexible Stoneware – (feldspar, clay, quartz, oxides and inorganic solid waste)
- Applications:** Wide range of applications, suitable for both interior and exterior walls.
- UV Resistance:** 20 Years
- Product Warranty:** 10 Years
